U-M Injury Prevention Center 2020 Summer Internship Program
Seeking Placement Opportunities

The University of Michigan Injury Prevention Center will fund up to 2-4 intern positions next summer supporting work in injury prevention. The Center will recruit graduate students interested in injury prevention research or practice experiences in specific topic areas. The goal is to offer students an opportunity to gain mentored research and practice-based experience in the area of injury prevention. Internships are funded by the Injury Prevention Center at a level of $1,500 per month for 3 months; positions should provide students an opportunity to work approximately 27-30 hours/week (a cumulative total of no less than 318 hours for the summer).

Topic areas eligible for paid intern placement include the prevention of:

- Opioid Overdose
- Suicide
- Adverse Childhood Experience
- Concussion
- Motor vehicle crash
- Youth violence
- Sexual violence
- Older adult falls

We are actively seeking placement opportunities for intern applicants.

If your department/organization is interested in providing a learning opportunity, we’d like to hear from you. Please respond by email to amrooker@med.umich.edu with the following information:

- Subject Line: Injury prevention summer interns
- A paragraph describing the injury-related project and what the student’s primary responsibilities would be
- Location of internship position
- Name of supervisor

Please send this information to us by January 26, 2020. If you have questions, please email Amy Rooker at amrooker@med.umich.edu
