

Prescription Opioid Misuse among Adolescents and Emerging Adults in the U.S.: A Scoping Review

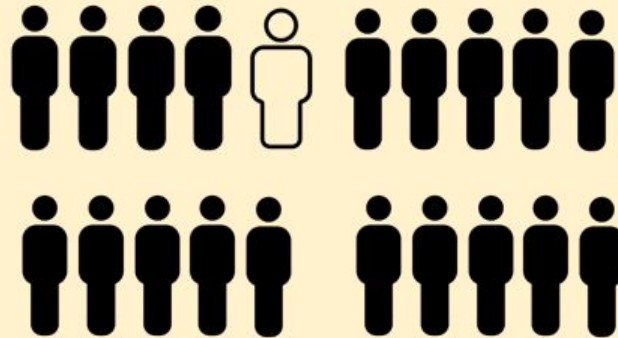

Current state of research shows that few studies explore prescription opioid misuse (POM) trajectories or the efficacy of prevention programs

76 studies focusing on POM met inclusion criteria

Literature published 2013-2018

Majority of studies focused on epidemiology

1 in 20 adolescents report POM

Lacking are studies focusing on POM trajectory & evidence-based prevention interventions
