From counties with available data (Fig. 3), suspected fatal overdoses from 3/1/20-9/16/20 were 15.0% higher than the same period in 2019.

Statewide EMS naloxone administrations from 3/1/20-9/16/20 were 28.8% higher than the same period in 2019.

Changes from 2019 to 2020 in both data sources varied across both time (Figures 1, 2) and space (Figures 3, 4).

Unreliable estimates are those based on counts <10 in 2019 and/or 2020.

Cases reported to SOS as of 9/17/2020.
