#### **CHANGE IN MICHIGAN OVERDOSES DURING THE COVID-19 PANDEMIC**

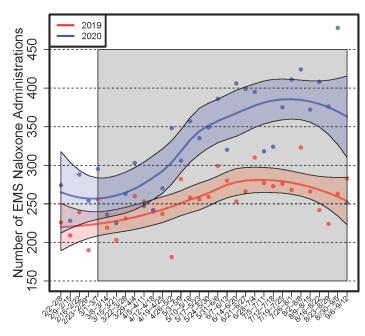

- From counties with available data (Fig. 3), suspected fatal overdoses from 3/1/20-9/16/20 were 15.0% higher than the same period in 2019
- Statewide EMS naloxone administrations from 3/1/20-9/16/20 were 28.8% higher than the same period in 2019
- Changes from 2019 to 2020 in both data sources varied across both time (Figures I, 2) and space (Figures 3, 4)

## FIGURE 1. SUSPECTED FATAL OVERDOSES BY WEEK IN 2019 VS. 2020

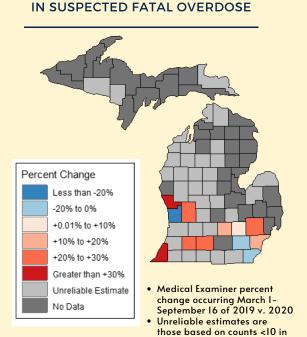

Counts of suspected fatal overdoses from counties with available data, by week, with the smoothed trajectory (line) and pointwise 95% confidence interval (shaded region) superimposed \*: Date range excludes 2/29 in 2019

#### FIGURE 2. STATEWIDE EMS NALOXONE ADMINISTRATIONS BY WEEK IN 2019 VS. 2020

Counts of statewide EMS naloxone administrations, by week, with the smoothed trajectory (line) and pointwise 95% confidence interval (shaded region) superimposed \*: Date range excludes 2/29 in 2019
