November News from the Injury Prevention Center

A letter from our leadership

On November 20, our 2020 Inaugural Research Symposium drew nearly 500 of us together virtually for an exciting day of presentations highlighting injury prevention research. Nine of our outstanding faculty researchers at the Center and over 50 researchers from across the world gave presentations. We had attendees joining us throughout the day from over 27 states, 9 countries, and 227 institutions. I was so proud of our researchers, seeing the excitement and expertise they projected as they shared their work. We are an impactful community!

I invite you to explore the Symposium abstracts and poster presentation slides we've shared below. Recordings from the day will be available on our website in the coming weeks.

I would also like to invite you to register for our suicide prevention summit which will take place in March 2021. The call for abstracts is also open for this event, and I look forward to seeing all your great research there.

We thank you all for your commitment to injury prevention science. We realize that many of you are in front-line positions in health care and public health - stay safe and thank you for all you do. Thank you to our large group of academic, community, and public health partners for contributing to the Center's success.
