

INJURY PREVENTION CENTER

UNIVERSITY OF MICHIGAN

U-M Injury Prevention Center Seeking Placement Opportunities for 2022 Summer Internship Program

The University of Michigan Injury Prevention Center will fund 5 intern positions next summer supporting work in injury prevention. The Center will recruit graduate and upper-level undergraduate students interested in injury prevention research or practice experiences in specific topic areas. The goal is to offer students an opportunity to gain mentored research and practice-based experience in the field of injury prevention. Internships are funded by the Injury Prevention Center at a level of \$1,500 per month for 3 months; positions should provide students an opportunity to work approximately 27-30 hours/week (a cumulative total of no less than 318 hours for the summer).

Note: Depending on current working environment and individual needs, internships may be in-person or hybrid.

Topic areas eligible for paid intern placement include the prevention of:

- Opioid Overdose
- Suicide
- Adverse Childhood Experience
- Concussion
- Motor vehicle crash
- Youth violence
- Sexual violence
- Older adult falls

We are actively seeking placement opportunities for intern applicants.

If your department/organization is interested in providing a learning opportunity, we'd like to hear from you. Please respond by email to tdhaut@med.umich.edu with the following information:

- Subject Line: Summer intern placement opportunity
- A paragraph describing the injury-related project and what the student's primary responsibilities would be
- Location of internship position
- Whether you anticipate this being an in-person or hybrid experience
- Name of supervisor

Please send this information to us by **Friday, December 10, 2021**. If you have questions, please email Taylor Hautala at tdhaut@med.umich.edu.
