

## Summer 2023 Injury Prevention Center Internships

The University of Michigan Injury Prevention Center is pleased to announce 5 paid internship positions for graduate and upper-level undergraduate students for the summer of 2023.

The internships are designed for students interested in injury prevention research or practice experiences. They offer important opportunities to gain mentored research and practice-based experience in a CDC-funded multidisciplinary injury prevention center. Interns could work with a mentor from the University of Michigan, the Michigan Department of Health & Human Services, or other organizations on ongoing injury prevention research or practice projects. This opportunity can fulfill the U-M MPH practicum internship requirements. Each selected applicant will be provided a stipend totaling \$5,700 (dispersed as 3 monthly payments). Depending on current working environment and preceptor needs, internships may be in-person or hybrid.

**Potential CDC placement:** The University of Michigan Injury Prevention Center also sponsors **one** competitive paid internship position for ***U-M public health graduate students*** at the National Center for Injury Prevention and Control at the Centers for Disease Control and Prevention in Atlanta. It is unknown whether or not this program will be in person or virtual this year. However, if travel is required, the selected applicant will be provided \$500 for travel to/from Atlanta, GA. Applicants should indicate in their application whether or not they would like to be considered for this placement.

### Responsibilities may include:

- Assisting in planning, developing, implementing, and evaluating injury prevention projects
- Assisting in implementing research methodologies appropriate to the study of injury prevention
- Conducting literature searches and synthesizing findings in written summaries as required
- Attending injury prevention-related workshops, seminars, and meetings
- Assisting in researching legislative policies and initiatives related to injury prevention
- Developing educational materials and tool kits based on identified needs
- Assisting in developing educational material for websites
- Assisting in communicating and presenting research or policy findings
- Assisting with grant preparation

### Qualifications

- Graduate level applicants must be enrolled in a graduate program or medical school at least through December 2023
- Undergraduate level applicants must be a rising junior or senior as at the time of the internship
- Interest in and commitment to injury prevention practice, policy, or research
- Ability to work independently in a collegial environment
- Ability to maintain confidentiality of sensitive information
- Excellent written and verbal communication skills

- Proficiency with computer software applications such as Microsoft Office, Excel, and PowerPoint

### Application Process and Contact Information
